Checklist for Initial Submissions

Complete details can be found in Information for Authors

Submission:
- ❏ The submission may be either a single PDF file containing all text and figures (pages and figures must be numbered) or multiple files: a manuscript file in Word, WordPerfect, RTF, LaTeX, or Text format and each figure in a separate TIFF (300 dpi) or EPS file.
- ❏ Individual files must always be used for multimedia (.MP4) and extended data
- ❏ The authors, title and abstract inserted on the submission form must match those in the separate title page and article file. The article file should not include a title page.
- ❏ Preferred reviewing editor(s) must be specified on the submission form. Excluded reviewing editors may also be included.
- ❏ Preferred and excluded reviewers may be specified on the submission form.
- ❏ Cover letter is optional.

Text:
- ❏ No information that would identify any of the authors is present.
- ❏ Sections appear in the following order: Abstract, Significance Statement, Introduction, Materials and Methods, Results, Discussion, References, Figure/Table/Extended Data Legends
- ❏ All pages are double spaced and numbered.
- ❏ No broken URLs are present in the text.
- ❏ No footnotes or appendices are present.
- ❏ No reference to supplemental material appears in the text, figures, or tables.
- ❏ Extended data (if provided) are cited within the body of the text and figure/table legend they support. Label as Figure 1-1, Table 1-1, etc. (i.e. Extended Data table supporting Figure 5 labeled as Figure 5-1).

Separate Title Page Includes:
- ❏ Title (50 words maximum)
- ❏ Abbreviated title (50 characters maximum)
- ❏ Names and affiliations of each author
- ❏ Author contributions
- ❏ Corresponding author's name and email address
- ❏ Number of figures, tables, and extended data figures/tables (separately)
- ❏ Number of words for Abstract, Introduction, and Discussion (separately, including any citations)
- ❏ Funding sources
- ❏ Conflicts of interest (if applicable)
- ❏ Acknowledgements

Abstract:
- ❏ Word count is ≤250.
- ❏ Species studied is identified in abstract (or title).
- ❏ No subheadings are present.

Significance Statement:
- ❏ Word count is ≤120.

Introduction:
- ❏ Word count is ≤750.

Materials and Methods:
- ❏ Sex of subjects is stated (male, female, or of either sex).
- ❏ Companies or individuals (with full affiliations) from which unusual materials were obtained are provided.
- ❏ Statistical method used is stated (descriptive and/or experimental design (random or nonrandom)).
- ❏ Statistical table is included.
- ❏ To preserve the double-blind process, the following statement regarding animal use is used: "All animal procedures were performed in accordance with the [Author University] animal care committee's regulations."

Results:
- ❏ Detailed information on each analysis performed is included with specific *p* values.

Discussion:
- ❏ Word count is ≤3,000.

Citations:
- ❏ Proper citation style for *eNeuro* is used.
- ❏ A reference is provided for each in-text citation, and *vice versa.*

Figures, Extended Data and Multimedia:
- ❏ Each illustration is numbered (separate numbering for figures and multimedia).
- ❏ Each illustration has a legend and is mentioned in the manuscript.
- ❏ All symbols are defined in the caption.

Tables and Extended Data:
- ❏ Each table is numbered and mentioned in the manuscript.
- ❏ Table contains no color or graphics.
- ❏ A legend and title are provided for each table.

Visual Abstract (optional):
- ❏ Summary graphical image best capturing the main findings of the article
